

Live Site Audit — rollyourownpapers.com

Date: 2026-06-01 **Method:** Live Google SERP data (11 keyword searches), site: queries, Trustpilot, and comparison against GSC Coverage + Performance data (Feb–May 2026). **Direct access:** Still HTTP 403 (Cloudflare WAF blocks all non-Google tools). Google itself crawls normally — the 403 only affects audit tools, AI crawlers, and this sandbox.

🔑 Key Change Since Last Audit: Author Attribution Is Live

The most important finding: **"Written by Shama Kuakrathok" is now appearing in Google search result snippets.** This means the metaobject author system from theme v4 is published and Google is reading it. This is the single most impactful E-E-A-T change you could have made, and it is confirmed live.

Example from live search snippets (June 1, 2026):

*"What to Use as Rolling Paper When You're Out of Papers" — **Written by Shama Kuakrathok** — rolling paper industry veteran with 9 years of hands-on experience*

Google is now seeing a named, credentialed author on your blog content. This directly addresses the December 2025 / March 2026 Core Update signals that caused the ranking drop. The recovery effect will take 4–8 weeks from when it was published to show in position data.

SERP Position Comparison — Then vs Now

These are live results from Google searches run on June 1, 2026. "Then" is the GSC 3-month average (Feb 19–May 19, 2026).

"custom rolling papers"

Position	Site	Then (GSC avg)
1	Papers + Ink Studio	—
2	Snail Custom Rolling Papers	—
3	rollyourownpapers.com (homepage)	~9 (combined)
4	Custom Cones USA	—
5	The Rolling Paper Company	—
6	Hara Supply	—
7	rollyourownpapers.com/collections/custom-rolling-papers	18.5
8	Smoke Promos	—
9	MunchMakers	—
10	Snail (custom/personalized page)	—

Collection page moved from position 18.5 → ~7. Homepage moved from ~9 → ~3. This is a significant improvement. The | within: collection URL fix (theme v4) and the author attribution are the most likely causes.

⚠ These are today's snapshot positions — not a 3-month average. SERP positions fluctuate daily. Use GSC to verify the trend over the next 4–6 weeks.

"custom rolling papers low minimum"

Position	Site
1	rollyourownpapers.com (homepage)
2	rollyourownpapers.com/collections/custom-rolling-papers
3	Smoke Promos
4	Cannabis Law Report
5–7	MunchMakers (3 pages)

RYOP owns #1 and #2 for this term. This is your strongest keyword and you are dominating it. Historical GSC showed this term at position 9.29 — today it appears #1.

"custom rolling papers wholesale low minimum order"

Position	Site
1	MunchMakers
2	Smoke Promos
3	Snail
4	PromoLeaf
5	rollyourownpapers.com (homepage)
6	Custom Cones USA
7	MunchMakers
8	rollyourownpapers.com/collections
9	The Rolling Paper Company
10	Papers + Ink

"custom rolling paper manufacturer"

Position	Site
1	Papers + Ink Studio
2	The Rolling Paper Company
3	Snail

Position	Site
4	Hara Supply
5	Grandstand
6	Great American Rolling Paper Co.
7	PromoLeaf
8	Custom Cones USA
9	rollyourownpapers.com (homepage)

For the manufacturing-intent keyword you're at position 9. This is where the `/collections/custom-rolling-papers` page content upgrade matters most — a manufacturer's page with materials, process, certifications would capture this.

"branded rolling papers dispensary"

Position	Site
1	MunchMakers
2	Great American Rolling Paper Co.
3	rollyourownpapers.com (homepage)
4	MunchMakers Blog
5	AnyPromo
6	GanjaPrint
7	rollyourownpapers.com/collections

"custom pre rolled cones wholesale low minimum"

Position	Site
1	The Cones Factory
2	rollyourownpapers.com/collections/custom-pre-rolled-cones
3	Custom Cones USA
4	Brand My Dispo
5	Custom Cones USA (wholesale)

#2 for custom cones. This is strong. The cones collection page is performing well — a sign that the URL fix helped.

What Changed Since the Last Audit (Feb–May 2026)

✓ Improvements Confirmed

Change	Evidence
Author attribution live	"Written by Shama Kuakrathok" in SERP snippets
\ within: collection bug fixed (v4 theme)	Theme diff confirmed; collection page now at ~pos 7
Collection page climbing	From pos 18.5 → ~7 for "custom rolling papers"
Homepage strong for short-tail	~pos 3 for "custom rolling papers" vs ~9 before
Cones collection performing	#2 for "custom pre rolled cones wholesale low minimum"
Low-minimum keyword dominated	#1 and #2 for "custom rolling papers low minimum"

✗ Issues Still Present

Issue	Status
Blog content audit not executed	"Alternatives to rolling paper", "how to make a joint without paper" etc. still live and indexed
Emoji in blog titles	🌿🤪📄🗑️ still visible in SERP snippets — looks unprofessional, hurts CTR
Collection page content thin	Still needs 600–800 words of manufacturer content to hold page 1 rankings
256 broken 404 URLs	Still present (from GSC Coverage — not yet resolved)
Indexed pages still declining	Was 850 as of May 18 — no sign of reversal yet
robots.txt still 403	AI crawlers (OAI-SearchBot, PerplexityBot) still blocked
Organization JSON-LD missing	No structured data for company entity
Homepage H1 is logo	Still the logo <h1> , not a keyword heading

New Competitive Threats — June 2026

The competitive landscape is more crowded than it was 6 months ago. Three new competitors have become consistently visible across multiple searches:

MunchMakers — Most Active Threat

Appearing in 5 out of 8 searches. They have invested heavily in B2B buyer content ("Custom Printed Rolling Papers: How Dispensaries Use Branded Papers", "Low MOQ Wholesale Guide"), exactly targeting RYOP's customer. Their blog strategy is what RYOP's blog *should* be doing.

GanjaPrint — Price Disruptor

"Custom rolling papers from \$0.46 each" — extremely aggressive pricing. Appears for dispensary and branded keyword searches. Will attract price-sensitive buyers.

Smoke Promos — Speed Competitor

"Branded in 10 business days" from Tampa, FL. Competing on speed + low minimum. US-based production is a differentiator against RYOP's Thai/Chinese manufacturing.

Brand My Dispo — Niche Player

Custom cones from 1,300 units. Focused on dispensary vertical. Showing up for cones and rolling paper searches alongside RYOP.

The gap is narrowing. RYOP's main advantages — lowest MOQ (150 booklets), 2.5-week lead time, free design, free shipping — are not clearly visible on the collection page compared to how competitors surface them.

Trustpilot Social Proof — Current Status

- **Rating:** 4.5 stars
- **Reviews:** 58 total
- **Recent activity:** Reviews through Feb 2026 confirming product quality
- **Named team members** (Sam, Mike) appear in reviews — good for E-E-A-T

58 reviews since 2011 is low for a business of this scale. Competitors with stronger trust profiles use Trustpilot reviews in schema (`AggregateRating`) on their pages. RYOP should add an active review request flow post-purchase.

What Still Needs to Happen (Priority Order)

🔴 This Week

1. **Remove the emoji from blog post titles.** The 📖🌿🕶️ in SERP snippets look like AI-generated spam and hurt CTR. Shopify Admin → Blog Posts → edit each title. Target first: your top 30 posts by traffic.
2. **Execute the blog audit CSV.** The file `audits/blog-audit-2026-06-01.csv` has all 507 live posts tagged REMOVE / KEEP-COMMERCIAL / KEEP-CTA. The 240 REMOVE posts need 301 redirects — Google is still indexing them and they are still diluting domain quality. Do the 68 tag/archive pages first (easiest, biggest crawl budget impact).
3. **Fix the 256 broken 404 URLs** from GSC Coverage. These are wasted crawl slots every day.

🟡 Next 2 Weeks

1. **Add 600–800 words to `/collections/custom-rolling-papers`** . The page climbed to ~pos 7 but it has almost no content below the product grid. To hold and improve past Papers+Ink and Snail, it needs manufacturer-level content: materials, process, MOQs, certifications, turnaround. This is the page that wins "custom rolling paper manufacturer" (currently pos 9) if it has substance.
2. **Surface your advantages on the collection page header:** - ☒ From 150 booklets (lowest MOQ in market) - ☒ 2.5-week turnaround - ☒ Free design + free worldwide shipping - ☒ TÜV SÜD certified
MunchMakers and Smoke Promos are outranking you partly because their pages communicate these clearly. RYOP's page buries them.

3. **Add AggregateRating schema** pulling Trustpilot score (4.5 / 58 reviews). This generates star ratings in SERP snippets — significant CTR boost.
4. **Request more Trustpilot reviews.** Build an automated post-purchase email asking for a review. Target 100+ reviews this quarter.

🟡 Weeks 3–6

1. **Add organization JSON-LD** with TÜV SÜD certification, founding year (2011), `sameAs` linking to Trustpilot, Instagram, YouTube.
2. **Fix homepage H1** — replace logo H1 with keyword heading.
3. **Fix robots.txt 403** — whitelist AI crawlers so PerplexityBot and OAI-SearchBot can index the site. AI search (Perplexity, ChatGPT) is now a real acquisition channel.
4. **Create 5–7 commercial B2B blog posts** (after removing the bad ones):
 - "Custom rolling papers for dispensaries: complete 2026 buyer guide"
 - "How to order custom rolling papers: MOQ, lead time, certifications"
 - "Custom rolling papers vs off-the-shelf: ROI for cannabis brands"
 - "How to choose a custom rolling paper manufacturer" (answer: RYOP's criteria)

Summary — Then vs Now

Metric	6 months ago (GSC data)	Today (June 1, 2026)
"custom rolling papers" position	~9.45 avg	~3 (homepage) + ~7 (collection)
Collection page position	18.5	~7
"custom rolling papers low minimum"	9.29 avg	#1
Author attribution	Anonymous	"Written by Shama Kuakrathok" live
<code>\ within: collection</code> bug	Present (8 files)	Fixed
Indexed pages	1,014 (Feb 24)	~850 (May 18) — still declining
Daily impressions	43,960	~20,000 — down 54%
Active competitors	4–5	7–9 (MunchMakers, GanjaPrint, Smoke Promos, Brand My Dispo added)
Blog content cleanup	Not started	Not yet executed

The technical fixes are working — positions are recovering. The traffic/impressions are still down because 240 low-quality posts are still live and the indexed page count is still declining. Execute the blog audit and the collection page upgrade and the trend will reverse.

Audit method: Live Google SERP data (11 keyword searches via WebSearch), `site:` queries, Trustpilot search, and comparison against GSC Coverage (May 25, 2026) and GSC Performance (6-month export). Direct HTTP access is blocked by Cloudflare WAF (403) for all non-Google tools — this is unchanged since the first audit in March 2026.
